PROFESSIONAL SUMMARY

Microsoft-certified (PL-300) Power BI Developer and Data Analyst with 5 years turning complex medical, legal, and insurance data into business insights. Expert in end-to-end Power BI delivery — advanced SQL transformation, Power Query ETL, star-schema modeling, advanced DAX, and Row-Level Security on Power BI Service — with hands-on Microsoft Fabric and Snowflake ELT experience. Ships production automation end to end, including a registered Power BI External Tool (DAX Workbench) that connects to the live model, generates and validates DAX, and deploys measures directly — removing hours of manual work for BI teams. Deep domain expertise across healthcare, legal, and insurance data.

AUTOMATION PROJECT

DAX Workbench — Power BI External Tool for DAX Automation & Performance Tuning *Live:* dax-workbench.onrender.com

- **One click from Power BI:** launches from Power BI Desktop's own External Tools ribbon and connects to the open model — a single executable, nothing to install or configure.
- **Write DAX and see the real number:** turns plain-English intent into production-ready DAX, verified on Microsoft's engine over the full data before anything is saved — and builds a field's whole measure suite (YTD, prior year, YoY %, moving average, rank) in one pass.
- **Make slow reports fast, with proof:** rewrites inefficient DAX and benchmarks before/after on live data, while a VertiPaq analyzer shows which columns are actually consuming the model's memory.
- **Change nothing by accident:** maps every dependency across measures, columns and tables, so what breaks is visible before anything is deleted.
- **Built and shipped solo:** 17,000+ lines of TypeScript with a C# / .NET 8 service, 107 unit tests, and automated CI/CD releases. Runs fully offline — no data leaves the machine.

TECHNICAL SKILLS

BI & Visualization: Power BI Desktop & Service, DAX, Power Query (M), Microsoft Fabric, Data Modeling, Star Schema, Bridge Tables, Row-Level Security (RLS), KPI Dashboards, Drill-through.

Databases & SQL: Advanced SQL — Window Functions, CTEs, Complex Joins, Subqueries, Views, Stored Procedures, Query Optimization & Performance Tuning; SQL Server.

Data Transformation: ETL & ELT Pipeline Design, Incremental Loads, Slowly Changing Dimensions, Job Scheduling & Failure Recovery, API & FTP Integration, Data Warehousing Concepts, Dimensional Modeling, Data Validation & Cleansing.

AI & Automation: AI-Assisted Development (Claude, ChatGPT), Prompt Engineering, LLM Integration, OCR & NLP Pipelines, Full-Stack Web App Development, Workflow / DAG Design, Automated Report Generation, CI/CD Deployment.

Programming & Tools: Python (Pandas, NumPy), SQL, TypeScript, Excel (Advanced Formulas, VLOOKUP/INDEX-MATCH, PivotTables, VBA Macros), Git/GitHub, VS Code.

Cloud & Data Platforms: Snowflake — Architecture (virtual warehouses, storage/compute separation, micro-partitions) and ELT Pipeline Design; Microsoft Fabric; Power BI Service, Cloud Data Warehousing, Workspace Governance & RLS.

Domain Expertise: Medico-Legal Data, Healthcare Analytics, Insurance Claims, Data Security & Governance.

Soft Skills: Problem Solving, Stakeholder Management, Business Requirements Analysis, Cross-functional Collaboration.

PROFESSIONAL EXPERIENCE

Senior Data Analyst & Power BI Developer

Dec 2022 – Present

Jacoby & Meyers (Bolster Legal) | US-based Medico-Legal Firm | Remote (India)

- Designed and deployed 14+ interactive Power BI dashboards tracking case progress, medical timelines, and financial KPIs; published and managed via Azure-hosted Power BI Service with scheduled refresh, improving operational visibility by 40%.
- Built complex DAX measures and calculated columns (time intelligence, RANKX, dynamic measures) over star-schema models with optimized relationships for high-performance reporting across large medico-legal datasets.
- Engineered robust ETL using SQL (complex joins, CTEs, subqueries, stored procedures) and Power Query to cleanse and structure raw data from databases, APIs, and FTP sources into centralized analytical systems.
- Configured Azure Active Directory (AAD)-based Row-Level Security to enforce firm-level data access; managed workspace governance, user permissions, report sharing, and automated refresh schedules.
- Owned production support for 14+ live dashboards — triaging refresh failures, resolving access escalations, and fixing root causes with documented resolutions.

- Designed and built internal AI-assisted automation tools — an OCR/NLP medical-record extraction engine, a PDF hyperlinking system, and a schema-driven data-validation and code-generation app — cutting manual document-review and reporting effort by up to 60%.
- Partnered with lawyers, legal teams, and case coordinators to translate business requirements into actionable analytics solutions across 500+ active cases.

Claims Analyst – Team Lead

Aug 2021 – Nov 2022

Amable Consultancy Services Pvt. Ltd | Mohali, India

- Led a team of 5 analysts processing and validating insurance-claims data, maintaining 99%+ accuracy and full regulatory compliance.
- Performed advanced data cleaning and validation using Excel (VLOOKUP, INDEX-MATCH, conditional formatting) and PivotTables.
- Developed analytical reports for claim-volume tracking, TAT analysis, and financial reconciliation.
- Streamlined data-quality processes, reducing error rates by 35% and improving processing turnaround.

KEY PROJECTS

Medical-Legal Claims Analytics — End-to-End Power BI Solution *Portfolio*

- Built a complete BI solution on synthetic medical-legal data: SQL Server views and stored procedures into Power Query ETL, a star schema with a bridge table, 40+ DAX measures, and 6 report pages plus an executive dashboard, secured with USERPRINCIPALNAME()-based dynamic RLS that scales to new firms with zero model changes, and published to Power BI Service.
- Implemented advanced DAX: time intelligence, RANKX leaderboards, an Nth-largest-value measure driven by a disconnected parameter table, and a dynamic measure selector.

AI-Assisted Automation Tools — Internal Productivity Suite

- **Architected and built 5 production tools** for the medical-legal document workflow, now used daily by the firm's team — owning problem analysis, pipeline/DAG architecture, and UI/UX design.
- **Mednex** — OCR + NLP engine converting unstructured medical-record PDFs into structured, chronological datasets and Word reports (FastAPI, PyMuPDF, SciSpacy).
- **SchemaForge** — schema-first data tool that ingests Excel/CSV, infers and enforces column types, validates data quality, and auto-generates Python / SQL / Power BI (M) code.
- **HyperPDF, PDF Annotator & Exhibit Builder** — automated PDF hyperlinking, document segmentation, and court-ready exhibit assembly.

EDUCATION

Master's in Biomedical Science (Stem Cell & Tissue Engineering)

2018 – 2020

Panjab University, Chandigarh | Gold Medalist

CERTIFICATIONS & ACHIEVEMENTS

- **Microsoft Certified: Power BI Data Analyst Associate (PL-300)** — Microsoft, 2026
- **SQL (Advanced)** — HackerRank, 2025
- **Snowflake — Architecture & ELT Pipeline Design** (in progress)
- Star Performer Award — 3 consecutive years • Excellence in Project Delivery (Client Recognition) • Process Improvement Champion (60% efficiency gain).
